

## **SPECIFICATION AMENDMENTS**

Please amend the specification as follows:

Substitute the paragraph starting at page 23, line 2, with the following:

Example methods for registering and dynamically loading media player plug-ins will now be described with primary reference to the flow diagrams of Figs. 7 - 10. The methods apply generally to the exemplary embodiments discussed above with respect to Figs. 2 - 6. The elements of the described methods may be performed by any appropriate means including, for example, by hardware logic blocks on an ASIC or by the execution of processor-readable instructions defined on a processor-readable storage medium.

Substitute the paragraph starting at page 23, line 9, with the following:

A "processor-readable storage medium," as used herein, can be any means that can ~~contain, store, communicate, propagate, or transport~~ store instructions for use by or execution by a processor. A processor-readable storage medium can be, without limitation, an electronic, magnetic, optical, electromagnetic, infrared, or semiconductor system, apparatus, or device, ~~or propagation medium~~. More specific examples of a processor-readable storage medium include, among others, ~~an electrical connection (electronic) having one or more wires,~~ a portable computer diskette (magnetic), a random access memory (RAM) (magnetic), a read-only memory (ROM) (magnetic), an erasable programmable-read-only memory (EPROM or Flash memory), ~~an optical fiber (optical),~~ a rewritable compact disc (CD-RW) (optical), and a portable compact disc read-only memory (CDROM) (optical).
